SANTORIN 30-500

EXCEPTIONALLY DEEP

The power and musicality of amplification, the precision of automatic optimization to room acoustics, the sensitivity of the 30cm honeycomb woofer, 360° down-firing... each and every detail of the Santorin 30 500 makes it the ultimate hifi home cinema and the leader of its category, and provides easy acoustical and aesthetical integration.

Cabasse

SANTORIN 30-500

30CM HONEYCOMB MEMBRANE

The honeycomb structure of the 30 cm woofer in the S30-500 permits a long excursion without deforming and distorting. High sound levels are possible across a wide frequency range thanks to the long voice coil, Kapton former and powerful magnetic field.

ADAPT TO YOUR ROOM

The Cabasse software for acoustical analysis and room correction is integrated in the 500W amplifier. The system comes with a measuring microphone ensuring a quick and automatic adjustment of the subwoofer's response thanks to its very reliable parametric digital filters. Three different set ups, manual or automatic, can be memorized and then selected with the dedicated remote control.

SPECIFICATIONS

Position	Floorstanding
Way	1
Drivers	1 x 12" 30ND40, with honeycomb dome diaphragm
Low pass filter adjustment	From 30 to 200 Hz in 1 Hz increments
Phase adjustment	0° to 180° in 1° increments
Delay adjustment	In one foot increments
Frequency response	22 - 200 Hz
Max SPL level	106 dB
Nominal power	500 W
Peak Power	1 000 W
Dimensions (h x w x d)	43 x 38 x 47 cm
Weight	28 Kg
Finishies	Glossy Black, Glossy White
