PRESS RELEASE
23 FEBRUARY 2021

CABASSE OPTIMIZES THE AUDIO PERFORMANCE OF THE PEARL AND THE PEARL AKOYA

WITH THE INTEGRATION OF THE GEN2 FUNCTION VIA THE CABASSE STREAMCONTROL APPLICATION FOR [iOS](#) and [Android](#)

Cabasse, leader in the Hi-Fi acoustics market, has launched a new sound profile, GEN2, available from the Cabasse StreamCONTROL application to further enhance the acoustics of its two popular high-resolution active connected loudspeakers, THE PEARL and THE PEARL AKOYA, both of which have already been distinguished with the Diapason d'Or award. These acoustic enhancements are now available for both iOS and Android and bring users even greater listening pleasure!

Cabasse connected loudspeakers in constant evolution!

One of the advantages of connected technology is the ability to keep products evolving and constantly improving. Driven by excellence and in pursuit of the perfect sound for each of its speakers, Cabasse has integrated the GEN2 sound optimisation, via its StreamCONTROL application directly into its on-board software, thus benefiting all users who already own these loudspeakers. By selecting the new GEN2 profile from the application (resulting from research of the Cabasse engineering team), users will discover a brand new sound signature. You will be surprised to rediscover THE PEARL range as you've never heard it before.

However, it is possible, depending on your preferences, or the configuration of the speakers in your room, to keep the original version (named 'Original').

Technical characteristics of GEN2:

- Optimization of the low-frequency dynamics: The signal processing of the new Cabasse DSP reinforces this already popular quality of THE PEARL and THE PEARL AKOYA.
- Optimised automatic room correction to further preserve the overall balance of the loudspeaker when auto-calibration is activated.
- Dynamic Fidelity Enhancer: THE PEARL and THE PEARL AKOYA adapt dynamically to the listening volume in order to offer the most faithful sound reproduction.
- Safety and balance at very high volumes: When listening to THE PEARL or THE PEARL AKOYA at maximum volume, the sound pressure limiter protects your speakers and eardrums as much as possible while respecting the overall balance and source dynamics.

The GEN2 profile is now available via the Cabasse StreamCONTROL application for [iOS](#) and [Android](#).

About Cabasse :

Cabasse, a French company founded in 1950 by Georges Cabasse, has always been committed in its quest for perfect sound and music reproduction without any alteration, coloration, or distortion. Driven by research and the desire to constantly innovate, Cabasse invented and developed coaxial loudspeaker technology. This technology makes it possible to house several loudspeakers in a small space, to offer music lovers and enthusiasts the essence and thrill of pure sound.

In October 2014, Cabasse was acquired by Cabasse Group (formerly AwoX Group) a pure-player of connected technologies and objects dedicated to the Smart Home, and experts in streaming technologies. Cabasse's ambition is to consolidate its position as a leader in Hi-Fi audio but to also be a key player in the Hi-Fi Streaming market.
